## electronic Customer Verification

### Perform Secure Electronic Identification and eKYC through WiseBOS eCV

Powered by **Regula** technology, the leader in government-issued ID documents, **WiseBOS eCV** is a powerful AML tool allowing you to build a **valid customer profile**, by performing **real-time ID & Face verification** in seconds and thus effectively reducing fraud exposure and eliminating the financial risk of your company.

Beyond being a powerful AML tool, **WiseBOS eCV** enhances your client onboarding journey by providing them with a seamless digital experience, resulting in customer satisfaction & loyalty.

### How does it work?

- STEP 01** Customer scans the ID document using their computer or smartphones' camera
- STEP 02** The ID is checked against security features with the use of computer vision, Machine Learning and Artificial Intelligence for authentication purpose

- STEP 03** Data is then automatically and accurately extracted from the ID document
- STEP 04** The customer takes a few selfies as per system recommendation to certify that the person pictured in the ID and the person in possession of that ID is one and the same.
